

As communicated to hospitals in the [November 2022 QIP-NJ newsletter](#), in response to discussions with members of the Quality Improvement Program – New Jersey’s (QIP-NJ) Quality Measurement Committee (QMC) and participating hospitals regarding MY1 performance, and following review of substantiated appeals, the NJ Department of Health (DOH) authorized a one-time re-calculation of MY0 (Baseline) and MY1 performance. The purpose of the recalculation was to recognize clinically-appropriate service capture, while preserving alignment with the intent of QIP-NJ performance measures, and minimizing unintended downstream impacts. These recalculations resulted in improved performance among many participating hospitals in MY0 and MY1.

As a reference, this document summarizes changes to QIP-NJ measure specifications, by measure. The changes will be reflected in the MY0 and MY1 Value Set Compendia and will be incorporated into specifications for subsequent MYs. This summary is specific to changes to measures: BH02, BH03, BH04, BH05, BH06, M001, M004 and M005. By default, all codes listed are CPT codes, unless stated otherwise or by reference via footnote. As codes may have been added to multiple measures, we recommend using “Ctrl + F” to search the document.

- BH02
  - The following discharge status codes were added to the exclusion value set to align with the intent of the measure:
 

▪ 03	▪ 51	▪ 63
▪ 20	▪ 62	
  - The following codes were added to the value set which do not require code modifiers:
 

▪ 99212	▪ 90853	▪ 90792
▪ 99213	▪ 90846	▪ 90791
▪ 99214	▪ 90834	
▪ 99215	▪ 90832	
  - The following telehealth codes were added to the value set:
    - Q3014\*\*
  - The following follow-up codes were added to the value set:
 

▪ 99496	▪ 96116	▪ 96167
▪ 99495	▪ 96121	▪ 96168
▪ 99441	▪ 96132	▪ 96112
▪ 99442	▪ 92524	▪ 96113
▪ 99443	▪ 96110	▪ 96171
▪ 98966	▪ 96170	▪ 90785
▪ 98967	▪ 96130	▪ 90840
▪ 98968	▪ 96131	▪ 90845
▪ 97151	▪ 96132	▪ 90875
▪ 97152	▪ 96133	▪ 0362T
