

QIP-NJ¹ MATERNAL LEARNING COLLABORATIVE

All NJ hospitals serving the maternal health population are invited!

Starting October 2022

GOAL: Improve treatment of severe hypertension among birthing people with a focus on identifying and addressing racial disparities and inequities for Black birthing people

STRATEGY

Adopting standard, evidence-based care practices

Forming effective relationships with community partners

Engaging patients and chosen family

Adopting a trauma-informed maternal health equity lens to addressing disparities in care

Increasing impact in some QIP-NJ performance goals

Training and coaching for frontline care team and leadership by experts

Access to a peer learning network

Increased quality improvement capacity across team members

Continuing professional education credits²

BENEFITS

PARTICIPATION REQUIREMENTS

Form an interprofessional team

Attend learning session conferences

Attend monthly coaching sessions

Collect and report data monthly

YOUR TEAM: Your team should consist of an interprofessional mix of clinical and non-clinical maternal health care team members, quality staff, a patient or chosen family representative, and other individuals supporting connections to maternal health care, specifically from L&D³ and the ED⁴. Your team should also include a representative from your system DEI⁵ team to build off current initiatives.

Submit a Participation Interest Form by August 26th to join. This form can be found on the [Learning Collaborative Website](#)
